Legislation

(Item 3A) Commissioner Miller advised that at his first Cabinet meeting of the New Year on Wednesday, January 5, 1949, the Governor had stated that it was his hope and that of the legislative leaders that the 1949 legislative session would be short. In response to a question about the procedure in the matter of legislative bills, the Governor made the following suggestion with reference to two types of bills.

(1) In the case of bills prepared by the various State Departments they are to be treated as if they were Administrative measures and copies sent to the Governor's office before being presented to the Legislature. The Governor would then agree to take these bills up with the legislative leaders and arrange for their introduction into the Legislature. After such an Administrative bill is introduced, it is entirely proper for the Department in whose behalf the bill is introduced to supply the sponsor of the legislation with supporting data and help in carrying through the bill.

(2) In the case of bills which are prepared at the request of members of the Legislature or citizen groups by a State Department, it was not necessary that the bills be cleared through the Governor's office; they would not be considered as Administrative bills.

Commissioner Miller further said that there are probably a number of bills that the State Highway Department would like to initiate and asked all of the staff of the Department to be working on any questions on which it was felt we should have legislation in order that the necessary bills may be prepared without delay.

Respectfully submitted,

A. Lee Grover

Secretary

His attendance record for the year 1948 shows that out of 251 possible working days he worked only 150 days, taking all of his sick leave, 16 days; his vacation, 12 days; 12 legal holidays which were allowed; 2 special holidays and 71 days without pay. Between the first of January and the first of March of this year, he lost the following time: Out of a total of 10 working days for the first half of January, he worked 2 days; out of a total of 11 working days for the second half of January, he worked 5 days. Specifically, in that, between his employment with the Department on September 17, 1945, and the present date, the employee has been involved in nine accidental injuries, and as a result of these injuries he has filed three separate workmen's compensation proceedings against the Department, and that during the course of the trial the first proceeding was dismissed on the ground that the employee had failed to prove a compensable injury.

At the hearing involving the two later proceedings the employee testified under oath that he cannot work steadily, only two or three days at one time. He cannot bend all the way over. He has pain on walking. He cannot hold anything too tight in his hand, and additional testimony indicating that he was physically unable to perform the regular duties of a Maintenance laborer.

At the afore-mentioned hearing held on March 17, 1949, Raymond Diehl testified that his continuous pain in various portions of his body was caused by the hard work in Sussex County and the lack of cooperation of his co-workers, as well as from other causes, and that after working one or two days he had to take off several days to rest up.
